

Launch the FitPlan Go app from your device

From the Dashboard on the left side, select NavLogs

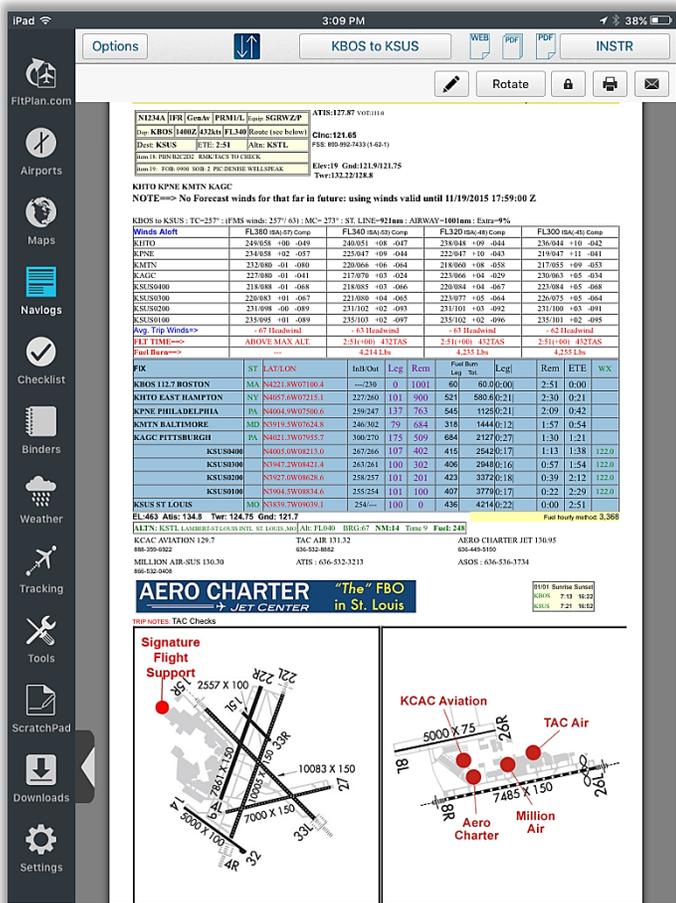

On the NavLogs header there are three viewing options: Web, Paged PDF, or Scrolling PDF

To choose a NavLog you wish to display, tap the My NavLogs / WX button from the NavLogs header

A drop-down box will appear containing Saved and Online NavLogs

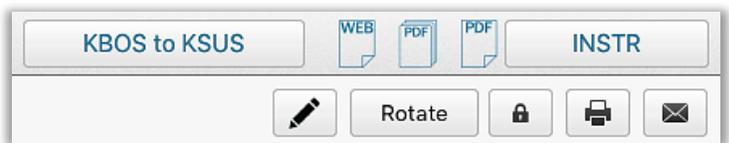

To open a Saved NavLog, tap the NavLog to open or the Refresh button to open the latest version

To download a NavLog from online, tap the Download button on the online NavLog

The downloaded NavLog will appear once the page has loaded

A second header will appear beneath the NavLogs header when selecting PDF versions containing the options to Edit, Rotate, Lock, Print, and Email the NavLog

The Edit button will allow you to draw on and highlight certain features of your NavLog. If you tap Done when finished, your changes will be saved to your downloaded NavLog

The Rotate button will allow you to rotate the view of your NavLog from your screen without needing to move your device

Rotate

The Lock button will lock the current view of your NavLog in place so it does not move between landscape and portrait modes if you are moving your device

The Print Button will allow you to print your NavLog directly from your device

The Email Button will automatically create an email with the NavLog as an attachment for easy sharing
