Smart Flight Scheduling by FltPlan.com

INNOVATIVE

FltLogic's smart widgets give you quick access to the information and functions that you need and allow you to customize your desktop view. Simply open the widgets that you need and hide the widgets that you don't.

INTEGRATED

FltLogic is the only flight scheduling program that integrates with FltPlan.com to offer accurate and reliable departure / arrival and estimated enroute times for your trips.

FltPlan.com

Powerful, web-based flight scheduling meets the accuracy and reliability of FltPlan.com

Master your flight scheduling with FltLogic, the only program that integrates with FltPlan.com. FltLogic offers complete flight planning and covers everything from ground transportation to catering to ensure that nothing slips through the cracks.

Time is Money. FltLogic's intuitive system eliminates costly scheduling conflicts by checking aircraft and crew availability. Because FltLogic integrates with FltPlan.com, you are assured of the most accurate flight times in the industry.

Widget Wisdom

FltLogic's smart widgets give you quick access to information and functions as needed and allow you to customize your desktop view. Simply open the widgets that you need and hide the widgets that you don't.

EVENTS. Create single or multi-leg flights, maintenance, training, and other events. Enter departure and arrival airports, create and view trip notes, and select pilots, crew, and passengers for each event leg. Make quick changes to passengers and crew to apply to a single leg or multiple legs of the same trip. Repeat frequent events for up to 6 months.

A preliminary flight plan is automatically created in the Captain and Co-Pilot's FltPlan.com accounts. Accurate arrival and departure times are automatically imported from FltPlan.com. Automatic notifications and emailed trip sheets ensure that everyone has the information that they need when they need it.

A link to the FltPlan.com Map Builder allows you to customize your route view with various base maps and overlays including weather, TFRs, and more.

Because we integrate with FlightBridge™ you can make hotel, rental car, and catering reservations directly from FltLogic.

CALENDAR. Choose monthly, weekly, or daily views and filter by aircraft, or pilot. Quickly and easily access event details from the calendar.

USERS. Access overviews and detailed pilot duty time reports. Enter and view passenger details and trip reports by passenger. Track and report SIFL rates and charges. Manage crew, staff, or passenger information and assign roles and permissions. Set permissions for creating, viewing, and changing events. Store FltPlan user account credentials.

AIRCRAFT. Create and manage profiles for aircraft including aircraft type, color, and performance data. Aircraft data is matched to arrival airport information to ensure that your dispatcher chooses an airport that can accomodate the aircraft selected for each trip. View utilization reports by individual aircraft or for the entire fleet. Upload aircraft-specific photos and documents.

LOCATIONS. Search for airports by name, city, and ID. View information about the airport and FBOs on the field to ensure that all of your passenger's needs are met.

REPORTS. View graphical reports of historical and projected pilot and aircraft hours.

Why FltLogic?

Integrated with FltPlan

Web & App Based

Low Cost

Excellent Customer Support

Integrated Reservations for Hotels, Transportation, and Catering

Unlimited Users and Aircraft

PRE FLIGHT
- Create and edit flights, training, maintenance, and other events.
- Repeat Event option saves time when entering frequent or recurring events. Events can be repeated for up to 6 months in the future.
- Pilot and passenger information can be carried over from one leg of a trip to the next.
- Quick change option allows for last minute crew and passenger modifications. Changes can be applied to multiple trip legs.
- Event creation automatically triggers creation of a preliminary flight plan in the Captain's FltPlan account.
- View and print passenger and pilot trip sheets.
- Automatic notification are sent to the pilot & crew when an event is created, when changes are made the day prior to flight, and four hours prior to the trip.
- Search for airport information, catering, hotels, and FBOs and book hotels, car rentals, transportation, and catering.
- View routes on FltPlan.com's Map Builder.

POST FLIGHT
- Create a Pilot Log Sheet for Flight Actuals. Can be completed online, submitted from the FltLogic app, or printed for manual entries.
- Log actual flight time including a breakdown of block time and flight time.
- Log fuel burned and fuel purchased.

CALENDARS
- Custom color coding of aircraft makes the calendar easy to read.
- View all events by Month, Week, Aircraft, or Pilot.
- Additional views available for one user or one aircraft.

LOCATIONS
- Quickly look up airport IDs, city and fuel information.
- From the airport information page quickly find hotels in the surrounding area.

REPORTING
- Pilot Hours by pilot – current, historical, and projected. Includes hours flown, number of legs, total distances, and more.
- Pilots – overview and individual passenger details. Includes hours flown, number of legs, total distances, and more.
- Passengers – overview and individual passenger details.
- Pilot duty time. Automatic notifications are sent to pilots who exceed duty time limitations.
- Aircraft Hours – current, historical, and projected by fleet or individual aircraft view.
- Aircraft Utilization – current, historical, and projected by fleet or individual aircraft view. Includes hours, legs, fuel cost, and more.
- Standard Industry Share Level (SIFL) tracking and reporting.

Not in the office? No problem.

Take FltLogic to go with the companion app

- Upload trip-related documents and photos of receipts.

- Enter flight actuals in the app for transfer to FltLogic web.

- The FltLogic app offers access to the FltLogic calendar and features a searchable event list and access to detailed event information.

- View trip sheets and passenger information.

- Link to the FltPlan Map Builder to view routes with custom map bases and weather overlays.

- Receive push notifications for new events or updates to existing events.
