FitPlan.com Announces FitLogic Scheduling Program

Web-based Program Integrates with FitPlan.com

Southbury, CT – *July 17, 2017*. FitPlan.com announces FitLogic, their powerful, web-based flight scheduling program. FitLogic is the only flight scheduling program that integrates with FitPlan.com to offer accurate departure/arrival times and estimated times enroute. FitLogic is comprehensive, full-featured, and designed to meet the needs and budgets of Part 91 flight departments.

FitLogic simplifies the process of scheduling and managing single and multi-leg trips, maintenance, training, and other events. The FitLogic interface is based on function-specific “smart” widgets for Events, Calendar, Users, Aircraft, Reports, and Locations. Each can be opened, re-sized, and closed as needed, allowing for an uncluttered desktop and quick access to desired information and important functions.

Entering a flight date and time in the Event widget automatically transfers a preliminary flight plan into the specified PIC’s FitPlan.com account. The FitLogic calendar features monthly, weekly, daily, pilot and aircraft views. Trip sheets can be viewed and printed and trip details can be emailed to keep everyone informed of important information. The Users widget features a time off/sick day/vacation day calendar and stores pilot currency information. FitLogic also features unique aircraft owner and administrative/read-only view logins to protect sensitive data.

The FitLogic companion app is available for download from the Apple App Store and offers access to the FitLogic calendar, features a searchable event list, and allows access to event information. The app allows users to view trip sheets and passenger information. Users also receive push notifications for new events and updates to existing events.

FOR IMMEDIATE RELEASE

“The development of FitLogic is, in part, a response to overwhelming demand from our users over the past few years for integration with their flight scheduling programs. FitLogic is an important addition to the FitPlan system and a logical next step in FitPlan’s evolution. FitLogic brings us a step closer to providing an affordable, approachable single-source flight planning and management solution for aviation professionals,” according to Sarah Wilson, FitPlan.com principal.

In addition to integration with FitPlan.com for flight planning, FitLogic integrates with FitPlan’s eAPIS program, features quick links to SMS, Flight Tracking, and eAPIS accounts. FitLogic and the companion app link to the FitPlan.com Map Builder, which displays routes on maps with selectable overlays for weather including TFRs, SUAs, and METARs. FitLogic also integrates with FlightBridge™, a full-service, aviation-specific reservation system for booking hotels, limousines, rental cars, and catering.

To schedule a demonstration of the FitLogic program, call 203-262-8500 or send an email to Support@FitLogic.com.

About FitPlan. FitPlan was established in 1991 and has grown into the largest flight planning company in North America. FitPlan’s 160,000-plus active, registered users file more than 55% of all N#-registered flight plans and more than 70% of all N#-registered flight plans for jets and turboprops. The FitPlan system includes free, web-based flight planning and filing integrated with the free FitPlan Go mobile apps for iOS, Android and Windows devices, along with a full range of premium services including SMS, Pre-Departure Clearances (PDCs), eAPIS and APIS for Mexico, Canada and the Caribbean, Premium Flight Tracking, a DCM Call Sign Program, Handling Services, and Runway Analysis. With more than 24 years of flight planning and filing experience, FitPlan strives to make planning simple and cost effective while providing outstanding 24/7/365 customer support.
