FitPlan.com Announces FitPlan Manager

New Program Offers Administrative Control of Pilots and Aircraft from a Single Account

Southbury, CT – *August 8, 2017.* FitPlan Manager is a new, premium program that gives charter operations, large flight departments, and fractionals control of the day-to-day flight planning activities of their fleet from a single, administrative account. A unique account is created for each aircraft in a company's fleet, and pilots simply log in to the account for the aircraft to which they are assigned for each trip. Access to these aircraft-specific FitPlan accounts gives department heads, schedulers, and dispatchers immediate visibility to scheduled flights and access to individual aircraft accounts when changes are necessary.

Aircraft performance profiles, ICAO data, and Weight & Balance are controlled at the administrative level to avoid potential errors and unwanted changes. Administrators can log in and view any filed flight plan and can post messages, upload documents, view scheduled flights, and track flights through FitPlan's existing Map Builder. The Map Builder allows users to view flights over sectionals, high altitude charts or other base map layers, as well as view NEXRAD radar, winds aloft, TFRs, SIGMETs, color-coded METARs and more.

"Our objective has been to make it easier for our growing number of pilots and flight departments to manage multiple accounts and multiple aircraft within the company under one centralized account," said Sarah Wilson, Principal of FitPlan. "The FitPlan Manager program allows users the flexibility to log in from any device using FitPlan.com or the free FitPlan Go app, which makes it extremely versatile" Wilson added.

FitPlan Manager is especially beneficial to flight departments who have dedicated mobile devices for each aircraft within their fleet. Pilots can be grouped by type rating so that they only have access to accounts for aircraft that they are qualified to fly. With FitPlan Manager, administrators can easily look up specific pilots, tail numbers, contact information, and more.

For more information on FitPlan Manager, please contact 203-262-8500 or send an email to FPM@FitPlan.com.
