

FltPlan Go Connectivity Instructions For X-Plane Simulator

1. Download the latest version of FltPlan Go for iOS, Android, or Windows.
2. Make sure that the latest version of X-Plane is installed.
3. Make sure that your device with FltPlan Go and computer with X-Plane are on the same wireless network.
 - a. Note: You are limited to one X-Plane user per network.
4. Open X-Plane on your computer:
 - a. Load a flight.
 - b. Go to **Net Connections** under **Settings**.
 - I. Click on **iPhone/iPad** and verify that all options are toggled on.
 - II. Use the default port and leave the IP field empty.
 - c. Close **Settings** Menu.
5. Open the FltPlan Go app on your device:
 - a. Go to the **External** tab
 - I. Select **X-Plane** under Simulators.
 - II. Wait until Status reads '**Connected**'.
 - b. Go to **Maps** tab
 - I. In **Maps** → **Options**: Make sure that **Enable Ship Position** and **Toggle Breadcrumbs** are turned on.
6. You are all set to start your flight on X-Plane and will see your position on FltPlan Go.

Note: You can view your flight on the Airport Diagram and Procedures by going to the **Airports** tab → choosing your desired airport in the top **Browse Airports** field → and selecting **Procedures**.
